New Librarianship

David Lankes

Professor and Dean's Scholar for New Librarianship,
Syracuse University's iSchool
2016-17 Follett Chair, Dominican's Graduate School of
Library & Information Science

- The mission of librarians is to improve society through facilitating **knowledge creation** in their communities

Who is our community?

Learning
Community

Research
Community

Teaching
Community

Our Mission

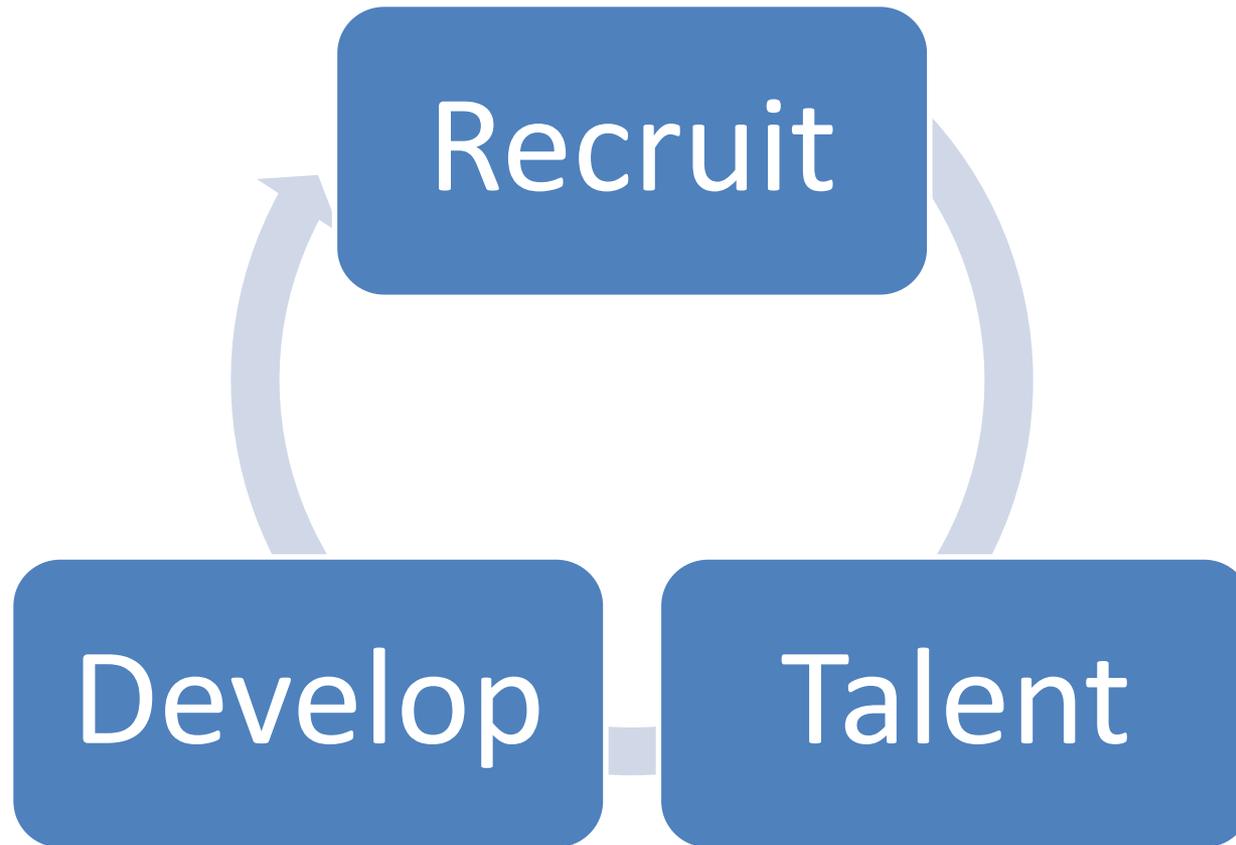

To actively engage and partner the NUS community in advancing scholarship and research through innovative library services

Preparing Librarians for the future

NUS Libraries embodies the new mandate, and continues to help its librarians:

- Be **ever ready** to meet new challenges
- Take **ownership** over building capabilities to meet evolving needs in teaching, learning and research
- Work in **teams** to create natural synergies

Framework for building capabilities

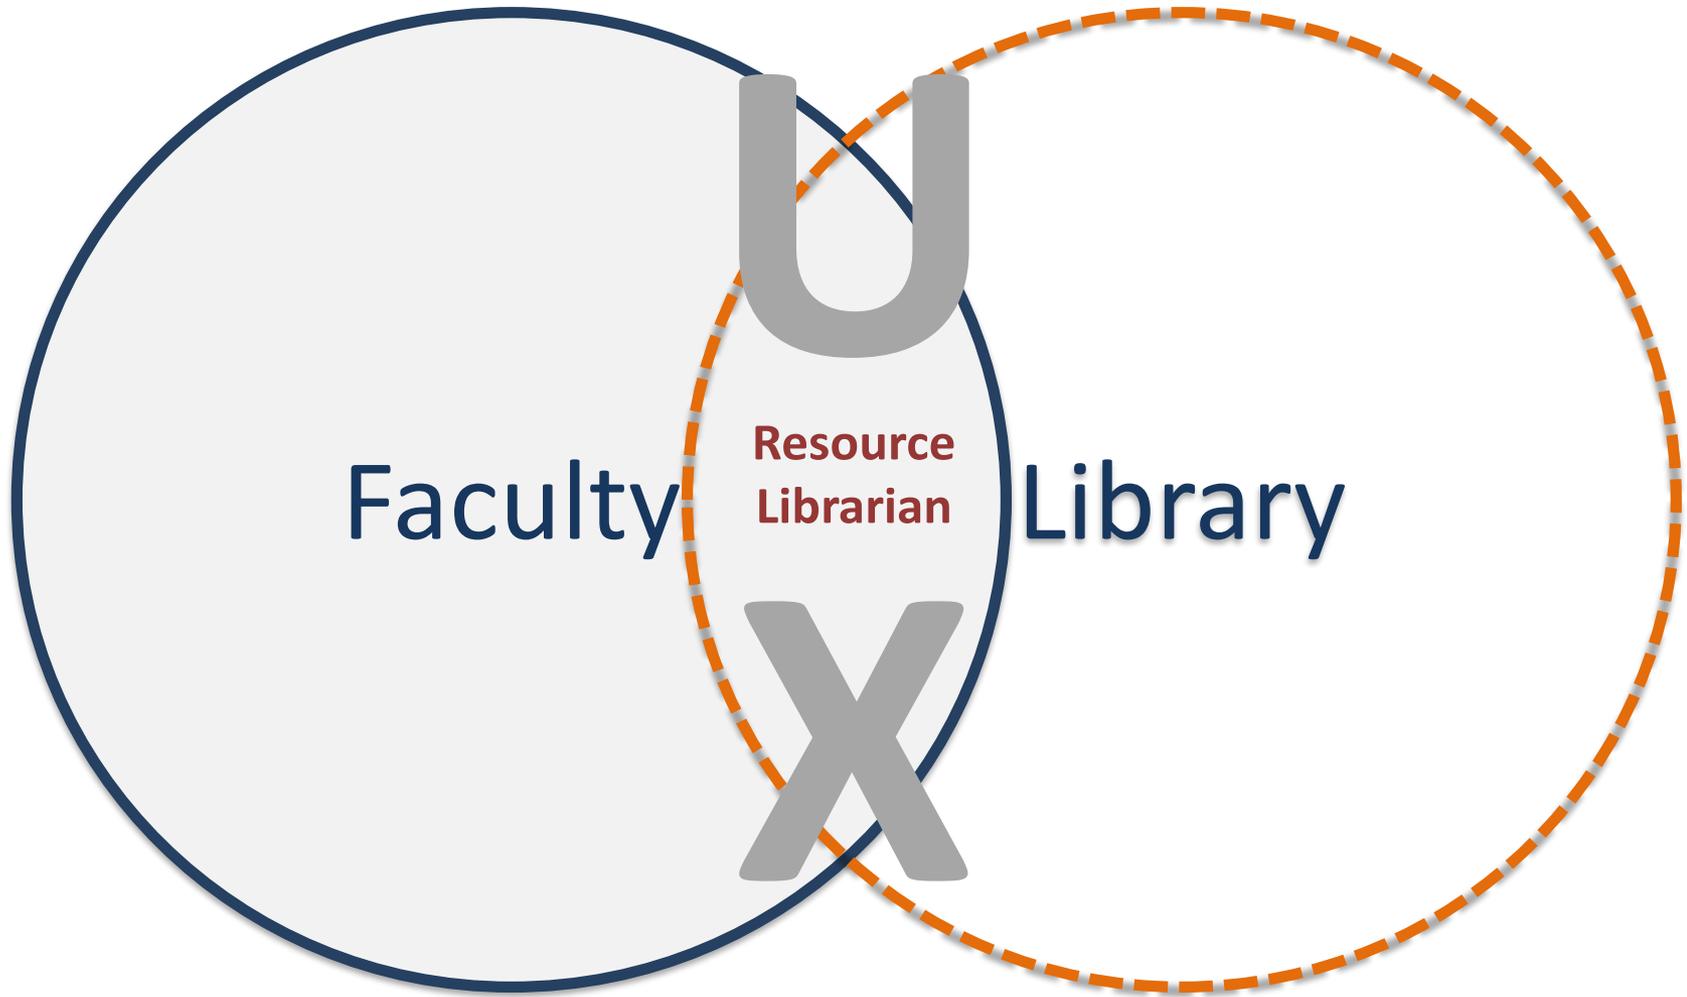

More on recruitment

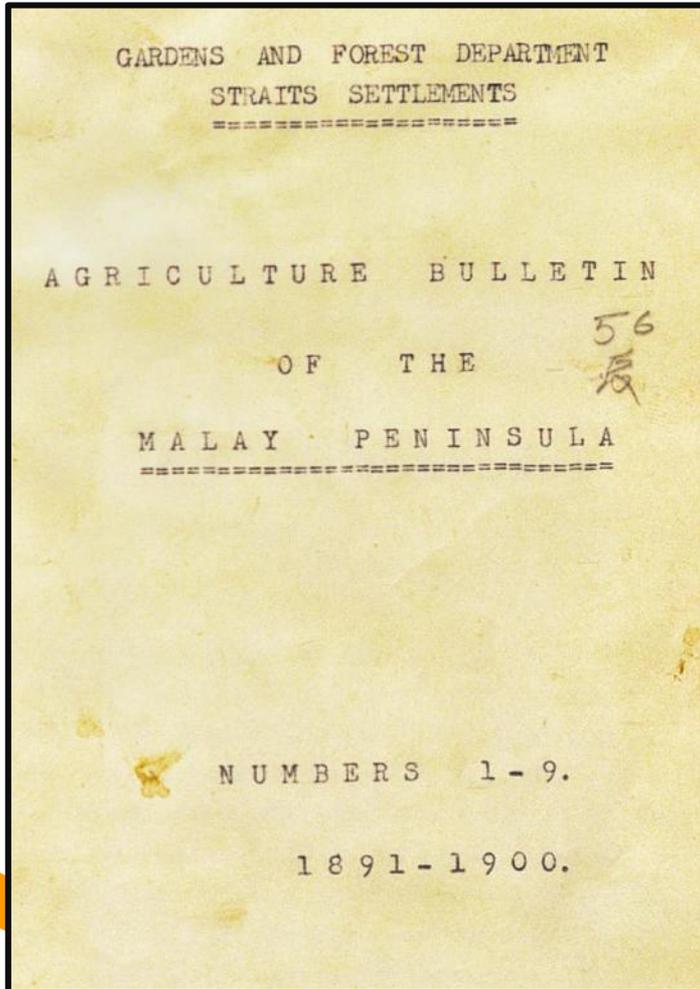

Recruit

1. Examples of emerging needs and trends that are identified; and influence library recruitment decisions:
 - Infographics
 - GIS augmented research and teaching
 - User Experience
 - Data Analytics
 - Digital Scholarship
2. Redeploy existing staff

Active engagement is key

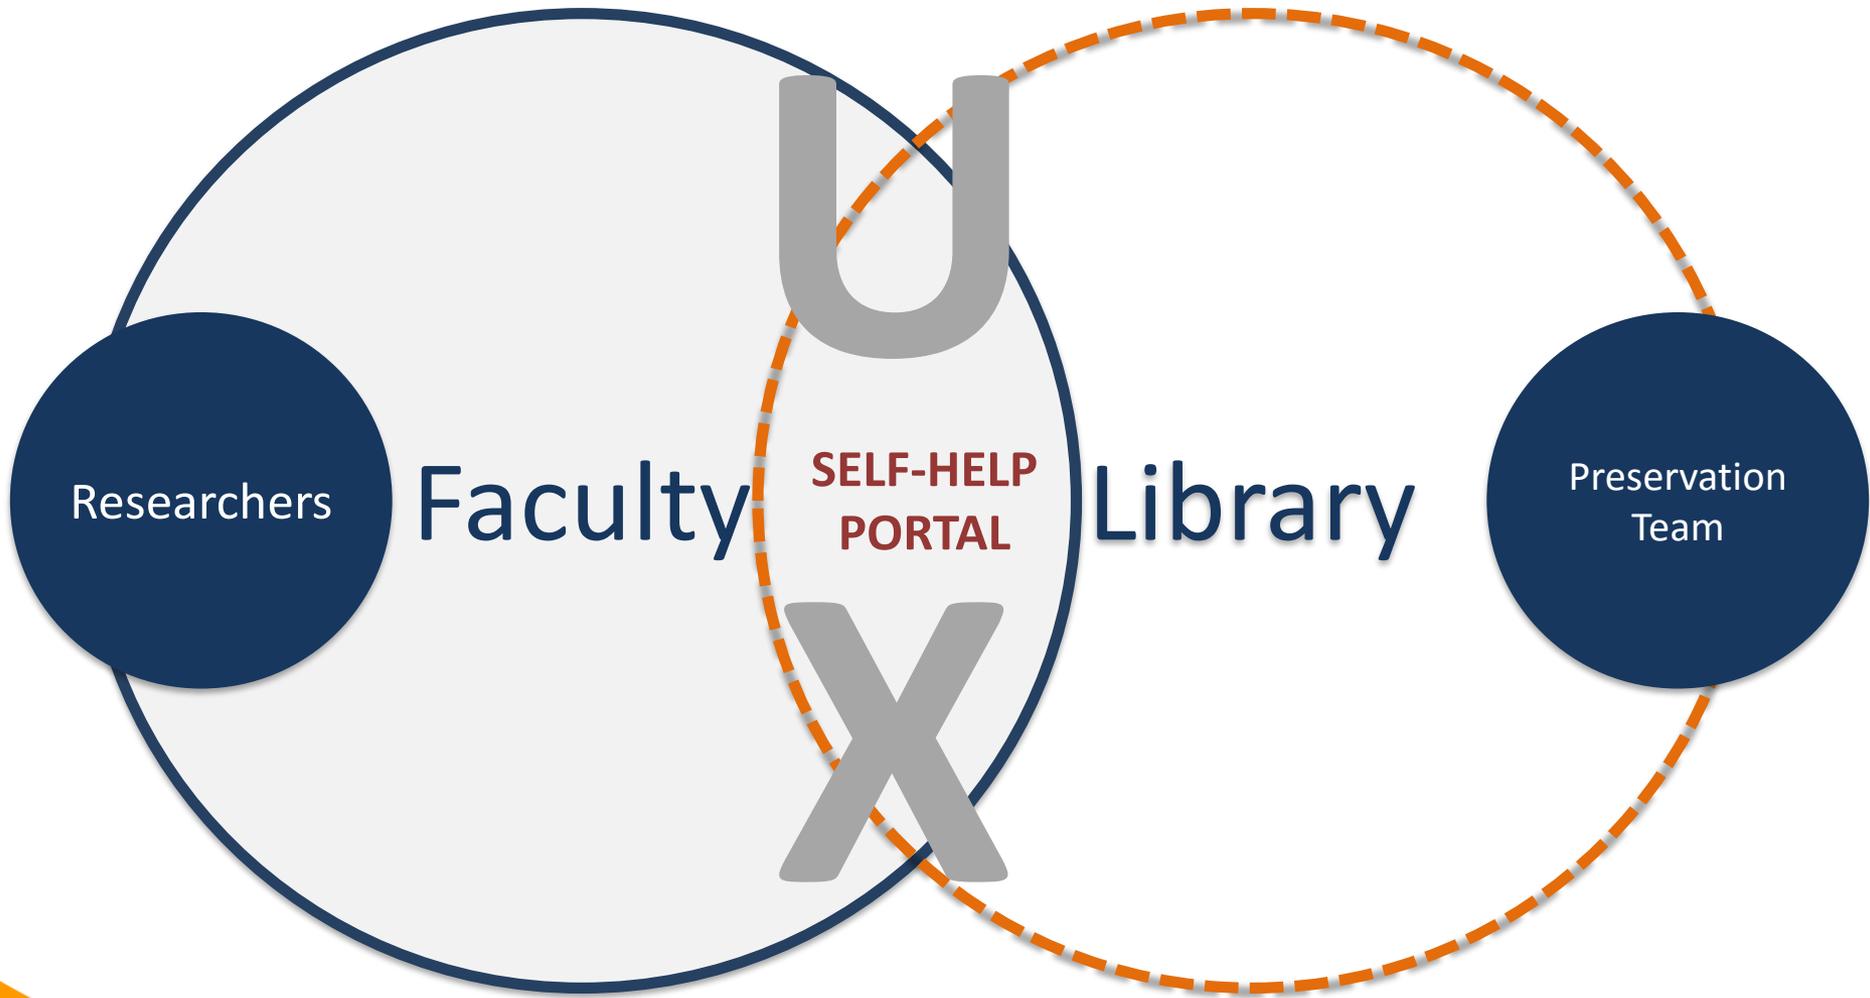

Applying **User Experience** Design in Digitisation Initiative

Preservation team set out to digitise rare print collections to:

- Enhance **searchability**
- Enhance **access** via web interface
- Enable emergent **digital methods** to leverage on these collections for research

Applying **User Experience** Design in Digitisation

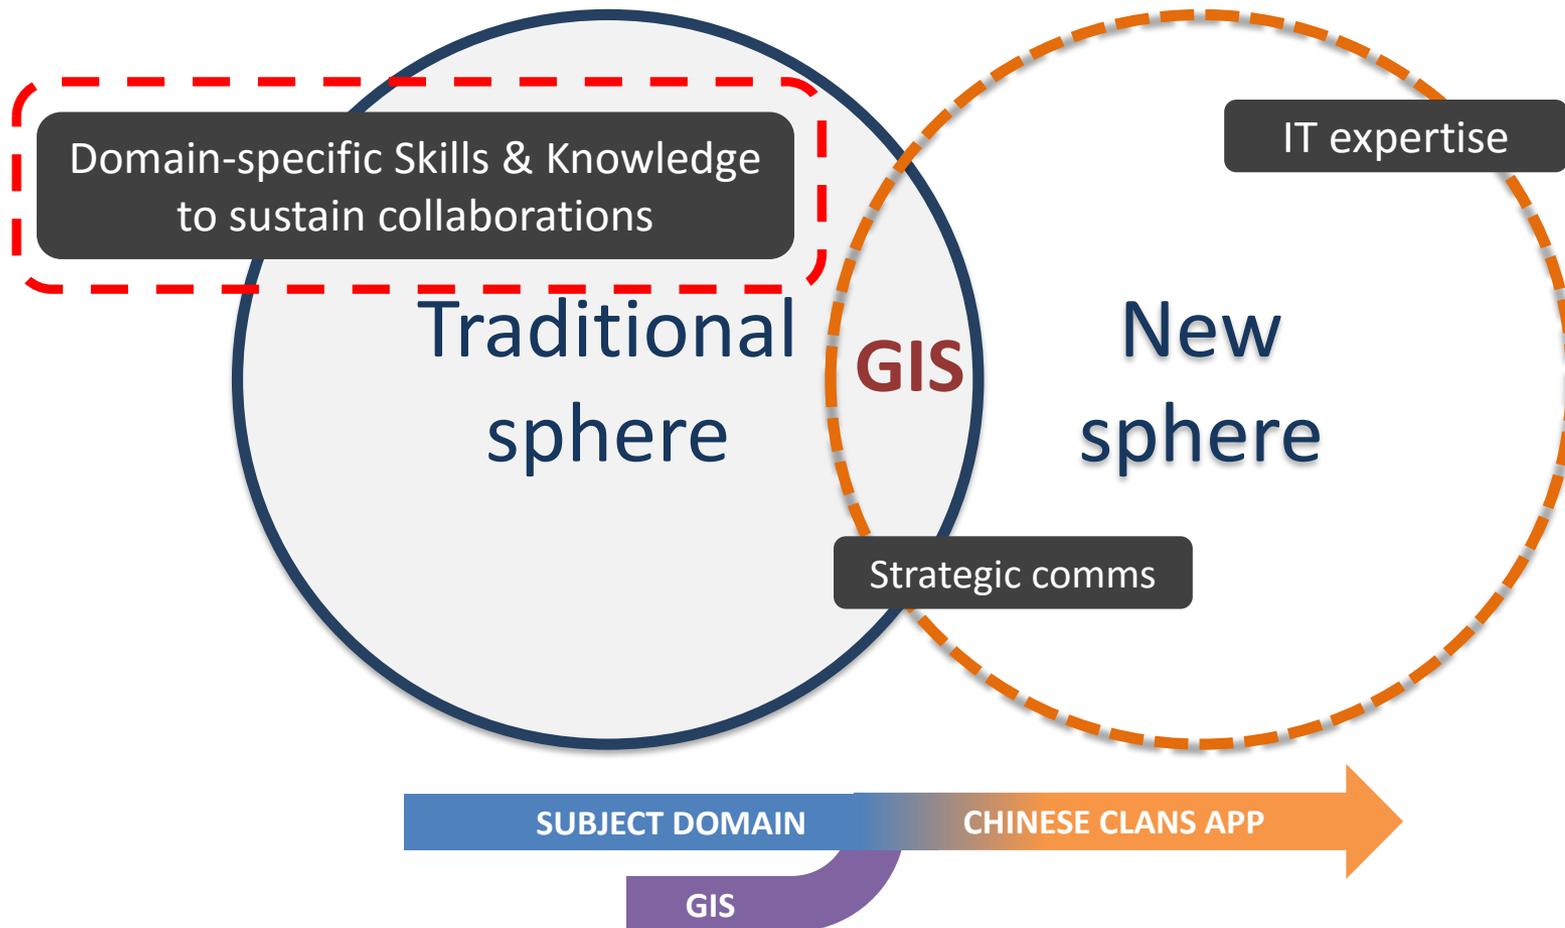

More on Talent

Talent

To better engage an academic community:

- Different and **non-traditional** skill sets are needed
- Greater **convergence** between different skills to produce more holistic and innovative services

Stretching emerging technology through convergence

More on Talent

innovation = idea + implementation

Vijay Govindarajan, The Other Side of Innovation

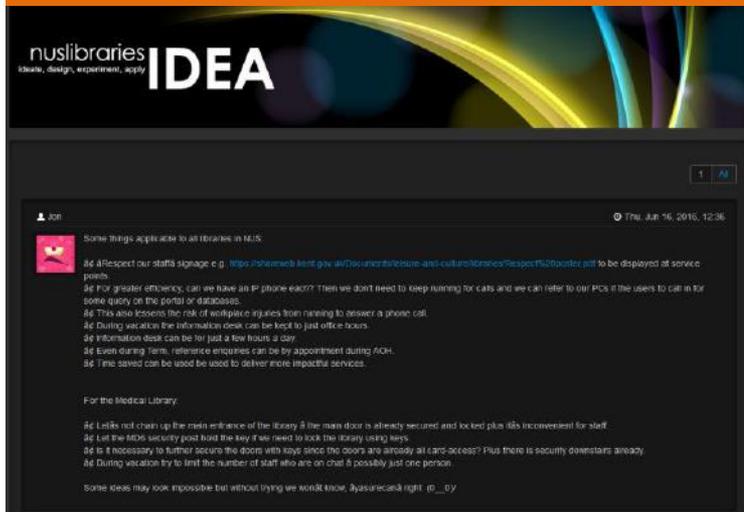

- Innovation not an abstract concept
- Librarians are trained in tools and techniques to apply **service design** into services and programmes.

More on Talent

Talent

Sustaining innovation by providing diverse channels for incubating ideas

Ideas, design, experiment, apply

IDEA

Some things applicable to all libraries in NUS:

- 1. Respect our staff's signage. e.g. <https://ahawewa.kent.gov.uk/Document/Issue-also-culture/Issue/respect%20poster.pdf> to be displayed at service points.
- 2. For greater efficiency, can we have an IP phone exact? Then we don't need to keep running for cats and we can refer to our PCs if the users do call in for some query on the portal or databases.
- 3. This also lessens the risk of workplace injuries from running to answer a phone call.
- 4. During vacation the information desk can be kept to just office hours.
- 5. Information desk can be for just a few hours a day.
- 6. Even during term, reference enquiries can be by appointment during ACH.
- 7. Time saved can be used to deliver more impactful services.

For the Medical Library:

- 8. Let's not chain up the main entrance of the library if the main door is already secured and locked plus it's inconvenient for staff.
- 9. Let the MEDS security guard hold the key if we need to lock the library using keys.
- 10. If it is necessary to further secure the doors with keys since the doors are already all card access? Plus there is security downstairs already.
- 11. During vacation try to limit the number of staff who are on call if possible just one person.

Some ideas may look impossible but without trying we won't know. @pasirecan@nuslib id ..._ry

More on Talent

Talent

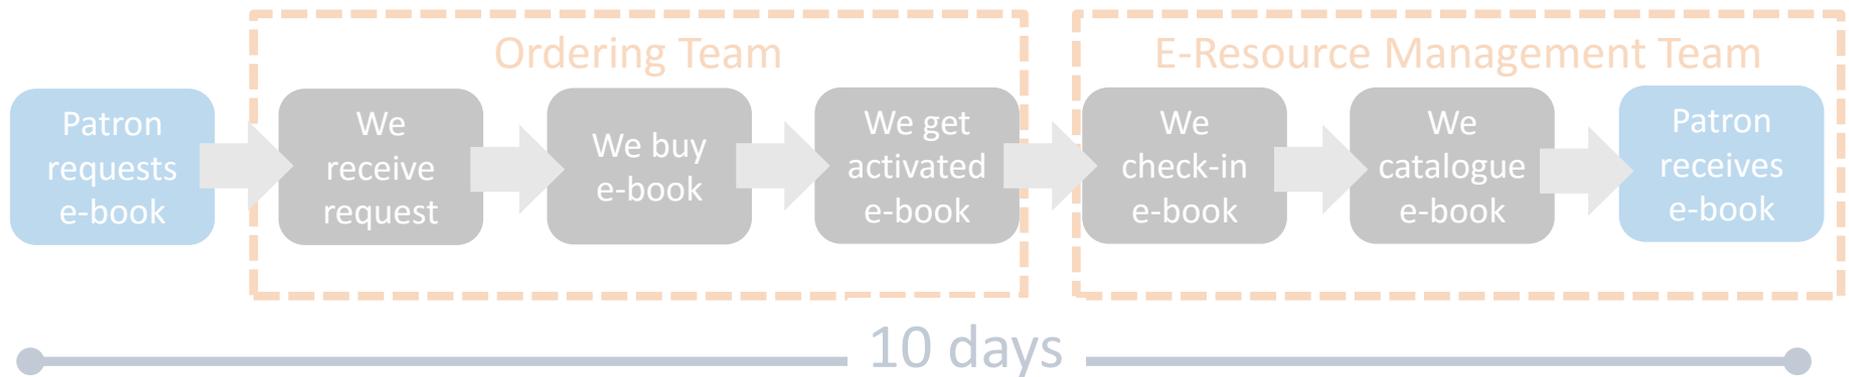

To realise more user-centric library initiatives:

- Adopt Lean Six Sigma's **end-to-end** perspective to enhance work processes
- Break silos and expand staff perspective on end-to-end processes that **start from** and **end with** the user.

Breaking silos in library units

Breaking silos in library units

...it was certainly a quick response, for which I am very grateful.

--- Dr. Chris Courtney, Asia Research Institute

You have all a fantastic and rapid job turning this round so brilliantly and responsively.

--- Prof Damian John Chalmers, Law Faculty

More on Development

Develop

70:20:10
development
framework

- Continuous assessment of **training and development needs**.
- Build on existing expertise/depth through training, or project work
- As community needs grow in scope and complexity, unmet needs are identified, and feeds back into recruitment

Librarians are in the **knowledge** business,
therefore the **conversation** business.

THANK YOU
